a
median abundance of the testable set
10^{-2}
10^{-3}
10^{-4}
pooled, one value per order
observed per sample
per sample, zeros filled
occupancy + mean only
measured
10^{2}
10^{3}
10^{4}
rarefaction depth, reads per sample
b
set overlap with the deepest rung (Jaccard)
1.0
0.8
0.6
0.4
0.2
0.0
median |preference − 0.5|
